SUMMARY

Software Developer with 4+ years of experience building real-time analytics dashboards and scalable web applications using React, TypeScript, Node.js and MongoDB. Focused on performance optimization, reusable component systems, API integration and clean, maintainable architecture. Experienced in Agile teams of 3–6 developers.

TECHNICAL SKILLS

- Html
- Css / Scss
- Bootstrap
- Shad-cn
- Tailwind
- Styled-components
- Javascript
- React
- React-query
- Typescript
- NodeJs
- Express
- NextJs
- Prisma
- NextAuth
- MongoDB
- PostgreSQL
- SQLite
- REST API design
- Git / GitHub / GitLab
- Postman
- Docker
- Agile / Jira / Confluence

EDUCATION

Bachelor's Degree — Marketing

Faculty of Economic Sciences
2022 – 2025

Front-End Web Design

ANC Accredited — IT School
2019

CERTIFICATIONS

MongoDB

Introduction to MongoDB – 2024

Microsoft

MTA: HTML & CSS – 2021

freeCodeCamp

Responsive Web Design
JavaScript Algorithms and Data Structures
Frontend Libraries

WORK EXPERIENCE

Software Developer

Everseen Limited (Sep 2020 – Present)

- Concurrently developed and maintained multiple enterprise-grade React/TypeScript/Node.js/MongoDB applications, including real-time analytics dashboards and a cross-platform PWA installable on desktop, tablet, and mobile — supporting media viewing, user annotations, backend-triggered actions, and data export capabilities across different business contexts.
- Refactored legacy processing pipeline, reducing export generation time from ~10 minutes to under 20 seconds — a 97% performance improvement.
- Built a reusable UI component library adopted across the platform, cutting new-feature development time and reducing UI inconsistencies across teams.
- Optimized front-end rendering and load times on data-heavy views through code-splitting and memoization, improving perceived performance on core dashboard screens.
- Collaborated closely with UX/UI designers in a cross-functional team of 3–5 developers to deliver responsive, user-focused interfaces.
- Worked in an Agile environment using Jira, Confluence, and GitLab — managing feature branches, rebasing, opening merge requests, and conducting code reviews as part of sprint planning and delivery.
- Tested and validated API routes using Postman, and containerized development environments with Docker to ensure consistent setups across the team

Head of FASO Department

Moemax Romania (Sep 2018 – Jun 2020)

- Led daily operations for the department, coordinating a team to meet efficiency and productivity targets.
- Streamlined workflows and communication processes, reducing operational bottlenecks.
- Managed inventory with precision, including daily stock checks and price verification.
